"I think this is a great opportunity to interact with that a specific specialty that is interested in really just doing the best for infants and a really great opportunity to show what your product can also do for this specific population."

"The nurses that are here are the influencers. They're the ones that take care of the babies, so we try to reach out to them and have them give us feedback on what's being used."

"Great conference, great people. There's nurses, there's the nurse managers, so the people we need to see who are decision makers and also the people who use our product every day."
